

MODEL ACLM

MULTI COMPRESSOR

Continuous development with advanced technology for split-type air conditioners.

Using just one condensing unit, it can be paired with 2 to 4 fan coil units

(with a total BTU capacity not exceeding 60,000 BTU/H).

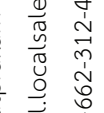

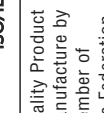

The fan coil units operate independently (one fan coil per compressor), allowing for space-saving installation of the condensing unit and enhancing the aesthetic appeal of your living space. Customers can choose from various fan coil unit designs, including wall-mounted, floor-standing, ceiling-mounted, or 4-way air distribution models, according to their needs.

SPECIFICATION MODEL : ACLM

CONDENSING UNIT MODEL : ACLM

CONDENSING UNIT MODEL : ACLM		CONDENSING UNIT MODEL : ACLM												(2 CIRCUIT)
